## Work Experience

### Laravel Developer

DEC 2024 - JUN 2025 Global Studio, Kathmandu

As a mid-level Laravel developer, deepened skills in payment integration, Docker-based development, and the repository pattern for clean architecture. Learned to optimize database queries using Eloquent relationships, eager loading, indexing, and query caching to improve performance across scalable applications.

### Laravel Developer

FEB 2023 - AUG 2024 KTM Rush Pvt. Ltd., Kathmandu

As a Junior Laravel Developer, gained hands-on experience building various types of web applications including CMS platforms, eCommerce sites, small accounting systems, travel booking websites, and job portals. Developed RESTful APIs, implemented queue jobs for background processing, and worked with Laravel's built-in features to create scalable and modular systems. Strengthened understanding of application structure, clean coding practices, and real-world problem solving across diverse project types.

### Laravel Developer (Internship)

AUG 2022 - DEC 2022 EkBana Pvt. Ltd., Kathmandu

During the internship, gained practical knowledge of Laravel's file structure, routing, and MVC architecture. Learned to write clean, organized, and maintainable code following Laravel best practices. Understood how to optimize performance for faster project execution and improved debugging. Built confidence in setting up and managing Laravel projects in real-world environments.

### SHORT BRIEF:

Web developer with 3 years of experience in both backend and frontend development. Proficient in Laravel, MySQL, HTML, CSS, JavaScript, AJAX, and Bootstrap. Experienced in building responsive, scalable, and efficient web applications with a strong focus on clean code and user-friendly interfaces. Brings solid problem-solving skills and clear communication, contributing effectively to collaborative development teams and successful project execution.
